Cornerstone Construction Group completes installation of new linear accelerator for major medical center

Cornerstone team is praised for no slow-down in patient care and meeting the project schedule amid unforeseen technical challenges

Los Angeles: Cornerstone Construction Group (<http://www.cornerstonecg.com/>) was retained by a major Southern California medical center to remodel and upgrade an existing vault and then install a new linear accelerator—radiation therapy for cancer patients.

As an approved vendor for this particular medical center, the Cornerstone team was able to self-perform electrical, demolition, infection control and all other aspects of construction having to do with the installation of the highly sophisticated equipment.

In addition, Cornerstone possessed the in-house electrical expertise to be able to understand the electrical requirements of the equipment, and read the schematics provided by the equipment manufacturer.

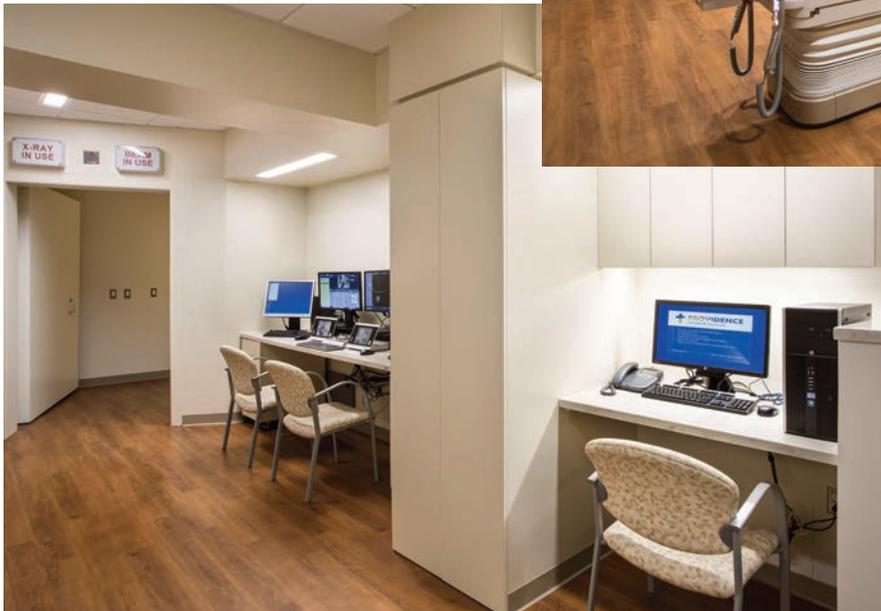

The medical center noted that the Redondo Beach-based team was remarkable in bringing several entities together to keep change requests to a minimum and to maintain their timeline. They saw that this in-house expertise avoided delays on the project.

Diagnostic Linear Accelerator

One senior Director at the Southern California medical center stated, “In the presence of unforeseen technical challenges having nothing to do with the construction team, Cornerstone Construction Group did an excellent job of scheduling and communicating with our management team. The project met the original schedule, despite technical set-backs and the hospital experienced no slow-down in patient care.”

Diagnostic Linear Accelerator Control Room

“Their infection control and attention to patient care were superb. Cornerstone’s response to our questions about local and state regulations was outstanding. I have managed several remodel projects and by far Cornerstone was superior to all others from start to finish.”

The work began in October and was complete in February – a total of 5 months. The Cornerstone crew is experienced working under Hospital Environment of Care Standards, Fire & Life Safety and Office of Statewide Health Planning and Development (OSHPD) requirements. The team is carefully trained in infection control standards and patient-area behavior.

ABOUT CORNERSTONE CONSTRUCTION GROUP

Started 30 years ago in Redondo Beach by Vic Braden and his wife, Linda, The Cornerstone Construction Group is a family-owned and operated construction business specializing in healthcare, commercial and facility services.

The management team was completed when their daughter, Stella, joined in 1999 and son V.J. joined in 2007. The family manifests a strong desire to invest in the continued development of the South Bay and over the years, they have spent their spare time and company resources helping their local communities.
